

PIE series Pipe Inspection Camera is a specialized tool used for inspecting the interior of pipes, drains, and sewer systems. It consists of a long, flexible cable with a camera attached at the end, which is inserted into the pipe to capture real-time video or images of the interior. These cameras help identify blockages, leaks, corrosion, cracks, or other issues that may be affecting the pipe's function.

FEATURES

- Camera head size of Ø39mm x 80mm
- Camera of 1080P(1920 X 1080), sensor 1/2.9" CMOS
- 9inch IPS screen, 1024*600 resolution
- Water and dust accumulation prevent
- 9000mAh Li-ion Battery Pack
- Comfortable and convenient plastic handle
- Digital meter counter function

TECHNICAL SPECIFICATION

Display Size	9 Inch Screen
Resolution	1024(RGB)x600
Play Back	Photo and Video with Audio
Recording	Video and Audio recording
Sensor	1/ 2.9" CMOS
Camera Resolution	1080P(1920 X 1080)
Camera size	Ø39mm x 80mm
Camera Length	260mm
Focus Distance	10 cm
Front Lens	Sapphire
Shell Material	304# Stainless Steel
Water Proof	IP68 20m water (Camera fix on Cable)
LED	Built-in 18 x LED (White)
External Memory	Support max 1TB SD card
Cable Length	100M
Cable Diameter	Φ9 mm
Battery	9000mAh Li-ion Battery Pack
Full Charge Work Time	7 Hours
Operating Temperature	Temperature: -10~50 °C Humidity: <95%RH
Power Adapter	Input: 110VAC~240V AC, Output: 21V DC 4A
Dimensions	Frame 790 x 400 x 900 mm Control Box 440 x 340 x 240 mm
Weight	38KG
