TEMPERATURE HUMIDITY DATALOGGER
TagPlus-TH

Stellar INSTRUMENTS

TagPlus-TH is a multiple-use temperature and humidity data logger with an LCD screen for easy viewing of temperature data. In this device, parameters can be configured by a professional user before use.

Complete trip history is recorded and downloaded as encrypted reports with summary data, graphs, and tables, the report can be directly read by PC at the destination. And the temporary mode allows this Thermometer Hygrometer to continue working after users have generated and read the temporary report.

It is an ideal choice for monitoring and recording the temperature and humidity changes of sensitive goods during transportation.

FEATURES

- Multi-use, configurable parameters
- Temporary reports available
- Up to 9 event markers
- Up to 6 alarm points
- Battery life up to 180 days, replaceable batteries
- ±0.5℃ at full range (-30℃ to +70℃)
- 35,000 readings maximum memory capacity

TECHNICAL SPECIFICATION

Temperature Range	-30℃ ~ +70℃		Accuracy	±0.5℃
Humidity Range	0~100%RH		Accuracy	±3%RH
Resolution	0.1℃, 0.1%RH			
Storage Capacity	35000 readings PDF only, 20000 readings PDF & CSV			
Log Interval	1 minute-24 hours			
Protection Class	IP65			
Start mode	0 minute-24 hours			
Stop mode	Memory full; When into USB			
Connection	USB, NFC (optional)			
Storage Environment	-40℃~+85℃(No battery)			
File Format	PDF/CSV/PDF&CSV			
Battery Type	3.0V CR2032 lithium battery			
Dimension	82mm x 39mmx 13.5mm			
Report Output	Automatic, no software needed			
Weight	30g
